EDUCATION

Vellore Institute of Technology

Bachelor of Technology in Information Technology; **CGPA: 8.85/10.0**

Vellore, India

July 2023 – July 2027

TECHNICAL SKILLS

Core Competencies: Frontend Development, Backend Development, Agentic AI, Machine Learning, RAG Pipelines, Data Analysis
Languages: Python, Java, C/C++, JavaScript, TypeScript, SQL
Frameworks & AI: Next.js, React.js, Node.js, Scikit-learn, LangChain, LangGraph, NumPy, Pandas, Matplotlib
Cloud & DevOps: AWS, Docker, Jenkins, CI/CD Pipelines, Git, Google Colab
Databases: PostgreSQL, MongoDB, MySQL

PROJECTS

VitCare 🏥 | *MERN Stack · LangGraph · FastAPI · ChromaDB · Tailwind CSS · Groq · JWT*

Feb 2026 – April 2026

- Developed VitCare, a full-stack **MERN** hospital platform with speciality-based doctor discovery, real-time appointment scheduling, and a campus pharmacy with cart management, prescription verification, and COD hostel delivery — built with React Router v6, Context API, and Tailwind CSS.
- Built a **RAG-powered AI medical assistant** via FastAPI using LangChain, Chroma vector store, Groq LLM (Llama 3), and Wikipedia/Tavily fallbacks — integrated as a persistent floating chat widget with session-isolated conversation history.
- Designed a multi-node **LangGraph StateGraph** agentic workflow with dedicated agents (Planner, Memory, Retriever, BookingAgent) enabling multi-turn symptom analysis, specialist recommendation, and end-to-end appointment management via chat, secured with JWT and human-in-the-loop confirmation.

CampusResolve 🏥 | *Next.js · AWS (EC2, S3, Cognito, DynamoDB)*

Nov 2025 - Jan 2026

- Architected a full-stack grievance management system with **Role-Based Access Control (RBAC)**, protected routes, and RESTful endpoints supporting grievance CRUD, status transitions, and complex query-based filtering.
- Integrated **Amazon S3** for media storage and **DynamoDB** for high-availability grievance persistence with sub-100ms retrieval, deployed on **AWS EC2** with **Cognito** handling authentication across student and administrator tiers.
- Implemented real-time state synchronization across dashboards with live grievance status updates and seamless student-administration interaction.

AskMyLecture 🏥 | *Python · Whisper · Ollama · BGE-M3 · Pandas · NumPy · Scikit-learn*

Nov 2025 - Jan 2026

- Architected an end-to-end playlist-aware **RAG pipeline** for educational videos, automating ETL from raw lecture ingestion to timestamp-grounded answer generation.
- Engineered a **Whisper**-based transcription system with timestamp-preserving semantic chunking and **BGE-M3** embeddings via Ollama, enabling precise intra-video and cross-video (playlist-level) concept retrieval using **cosine similarity**.
- Integrated Gemini API for LLM reasoning to generate context-grounded answers with exact video timestamps, ensuring verifiable, lecture-aligned responses.

Schedulify 🏥 | *Next.js · FastAPI · LangGraph · MongoDB Atlas · Google Gemini*

Sept 2025 - Oct 2025

- Architected a **6-node LangGraph** agentic pipeline (Intent Extractor → Goal Framer → Query Builder → DB Retriever → Ranking Engine → Response Generator) powered by Google Gemini, enabling users to book any real-world service through natural-language chat, with dynamic clarification handling and multi-factor ranking by rating, availability, and urgency.
- Built a decoupled full-stack system with Next.js 15 + TypeScript and a Python FastAPI microservice, featuring custom **JWT** auth, role-based dual dashboards (customer AI chat portal and provider admin hub), and a booking ledger with cancel/reschedule support.
- Engineered a denormalized **MongoDB Atlas** document model where each provider's services, pricing, tags, and availability are stored as embedded arrays for fast retrieval, and built an in-app interactive booking calendar that visualizes confirmed appointments with date-dot indicators, pulling upcoming bookings directly from the database for both customers and service providers.

CERTIFICATIONS

- AWS Academy Graduate – Cloud Architecting (Amazon Web Services)** 📄 Apr 2026
- Java Data Structures & Algorithms – Udemy** 📄 Sept 2025
- DevOps, Agile and Design Thinking – IBM Career Education** 📄 Jun 2025

EXTRACURRICULAR

IEEE Computer Society (IEEE-CS) | Senior Core Member

May 2024 – May 2025

- Organized **HackBattle**, a university-wide hackathon with **600+ participants**, managing technical operations and event logistics.
